

VVV@Vs Venous, Venous and More Venous WORKSHOP @ VEITHsymposium

ASK THE EXPERTS!

VENOUS, VENOUS and More VENOUS WORKSHOP At VEITHsymposium CASE PRESENTATIONS & REAL-LIFE CHALLENGES

Wednesday, November 20, 2024 | Americas Hall 1, 3rd Floor

1:00 pm - 6:00 pm

The focus of the Workshop is to help attendees develop their skills so that they are prepared to make better clinical decisions when treating patients with venous disease. During the Workshop, experts will show how they handle real-life complex and challenging cases. Presentations will include information on superficial venous disease, acute and chronic deep venous disease, and aesthetic phlebology. In addition, attendees will have time to visit workstations where they can test products and ask questions.

The VEITHsymposium Venous Workshop will use the following methods to highlight key teaching points in venous disease management:

- Video Case Presentations
- Hands-On experience providing participants a forum to test products and ask questions regarding the products and their uses
- Faculty-led discussions on challenging real-life situations in the management of venous disease
- Panel discussions to elicit expert contributions on best practices in vein management

Lowell S. Kabnick, MD, FACS, FAVLS, DFAVF
Venous Workshop Director

Thomas W. Wakefield, MD, FACS
Venous Workshop Co-Director
